LOTTERY FUNDED

Lost & Found

We are launching Lost and Found, a project supported by the Heritage Lottery Fund charting the history of secure settings from 1948 to the present day.

Uncovering the hidden and untold stories from local people with learning disabilities who used secure settings. We will present first hand accounts of life in a secure setting and how life has now changed for the positive for people now living in the community.

This engaging and historically significant work has been co-produced by a dedicated 'History Team' of self advocates and officers from Changing Our Lives.

Patient's Council

A photograph of a garden with several wooden benches arranged on a stone path. The garden is filled with various colorful flowers, including purple, yellow, and green ones. The scene is bright and sunny.

The Patient Council is a best practice model for putting patients at the centre of their care and treatment. Their innovative and creative ideas shape the service that they receive.

Birmingham University has evaluated both the Patient Council and the Quality of Health audits in terms of the impact they have had on the patients themselves, the impact on professionals within the Black Country Partnership Foundation Trust and the improvements made to services as a result. This work highlights the strategic partnership between a foundation trust and a self-advocacy organisation and the outcomes that can be achieved.
