

Some parents of autistic children are told there is nothing they can do to help, we beg to differ ...because autism is treatable.

Treating Autism 2ND International Biomedical Conference & Exhibition

BOURNEMOUTH INTERNATIONAL CENTRE 13TH & 14TH MARCH 2009

The 2009 conference will be the biggest autism-specific biomedical conference the UK has ever seen. With a host of expert speakers from across the globe - as well as from here in the UK including: **Bryan Jepson MD, Dr Natasha Campbell McBride, Professor Boyd Haley, Dr T Michael Culp** and **Karen DeFelice**.

Amongst our **Stories of Hope**, UK parents **Sandy** and **Tim Collins** will be telling delegates how they officially recovered their son, Eddie, from autism.

Scores of exhibitors will be on-hand selling everything autism-related and at special conference discounts.

Meet and Greet with delegates and practitioners on the evening of March 12th and enjoy a fabulous evening shin-dig, sumptuous buffet and goodies galore at **Treating Ourselves** at the Landmarc Restaurant Theatre on the 13th.

Early Bird Discounts available at
www.treatingautism.co.uk or call **01926 642 598**

Members of Treating Autism enjoy conference discounts, an up-to-the-minute newsletter quarterly, substantial discounts at reputable supplement providers, a complimentary biomedical book and a host of other essential resources. Join us at www.treatingautism.co.uk

FOR PARENTS, CARERS & PROFESSIONALS

Before biomedical my son was unhappy 90% of the time. Since starting treatment he's happy 90% of the time.

- conference delegate 2007

Confirmed speakers

Bryan Jepson, M.D. (USA) is best known to the autism community for his 2008 book "Changing the Course of Autism" an essential reference for both parents and physicians. This book is included gratis for each conference attendee. His Children's Biomedical Center of Utah (a non-profit organisation) treated hundreds of children on the autism spectrum. He is now on the team at Thoughtful House in Texas.

Dr. Natasha Campbell - McBride, M.D. (UK) is the author of "Gut and Psychology Syndrome" (GAPS) which demonstrates the essential role of the gut in our mental health. She holds a Degree in Medicine and a Postgraduate Degree in Neurology and has also completed a Postgraduate Degree in Human Nutrition. At her Cambridge Clinic she specialises in nutrition for children with learning disabilities, and adults with digestive and immune system disorders. Her son, Nicholas was diagnosed with autism when he was 3 years old. Nicholas now attends a mainstream school.

Professor Boyd Haley (USA) returns to the UK after a fascinating presentation at the 2007 Treating Autism conference. Dr. Haley received a doctorate in Chemistry/Biochemistry at Washington State University. He has been a professor at the University of Kentucky since 1996. He was one of the first researchers to propose that the preservative Thimerosal in infant vaccines was the most likely toxic agent involved in Gulf War Syndrome and autism related disorders.

Karen DeFelice (USA) has worked in the areas of education and the sciences over 24 years. She is author of "Enzymes for Autism and other Neurological Conditions: The Practical Guide to Digestive Enzymes" and "Enzymes for Digestive Health and Nutritional Wealth". Her enjoyable down-to-earth style comes from first hand experience with chronic health issues in herself as well as her family and using enzymes as part of a total health solution.

Dr T. Michael Culp, MA, ND. (UK) is a world authority on Single Nucleotide Polymorphisms, more commonly known as SNPs (pronounced snips). More than 99% of human DNA sequences are the same; however, the variations, or SNPs, can have a major impact on how we respond to things such as viruses, toxins, bacteria, and other assaults. Dr. Culp will explain how to test for SNPs believed to play a role in autism and how this information can be used to make treatment decisions. Dr Culp has taught nutritional biochemistry at Bastyr University and has lectured extensively.

Treating Ourselves at Landmarc Restaurant Theatre - Friday 13th March at 8pm. Whether you're coming along with friends or family or on your own we will be sure to make you very welcome. A chance to meet other parents and practitioners whilst enjoying Landmarc's legendary buffet in this beautiful converted Methodist church setting just a few minutes walk from the conference centre.
