Breathlessness in Palliative Care

This session aims to provide the participant with a “toolkit” of non-pharmacological techniques to manage breathlessness in palliative patients and to be aware of the impact breathlessness and its treatments have on the patient.

Learning Outcomes:

- To be aware of the prevalence of breathlessness in cancer patients
- To learn strategies to assist patients manage their breathlessness
- To be aware of the services we run at St Nicholas Hospice Care to help the breathless patient
- To learn about the benefits and limitations of oxygen therapy
