

Health Checks for People with Learning Disabilities

We want to help your family doctor (GP) get better at doing health checks for

people with learning disabilities. We also want to help people where you live understand more about the health needs of people with learning disabilities.

We are starting two discussion groups to help us do this.

One group will be on health checks. The other group will be on measuring health needs.

Getting Involved

We want to hear from people with ideas about how to help GPs do these things better.

We want to share ideas and then we will write and publish some guidance for GPs. To get involved you need to go to our website <http://www.improvinghealthandlives.org.uk/talk> and then join one (or both) of these groups. You may need to register as a user of the website first (but that is not too hard).
