# The fasdtrust Medical Professionals Conference & Forum

13th & 14th October 2011  
Oxford Witney Four Pillars Hotel

Duckington Lane, Witney, Oxfordshire, OX28 4EX

The conference will be a dynamic and exciting event, a unique forum as it is the first in the UK to be held. This is the first meeting of the professional group to educate and train them in diagnosis and recognition of FASD. The aim is that at the end of the two days people will feel confident in recognising, identifying, diagnosing and managing FASD. The process will involve lectures and practical workshops open to all attendees to build confidence in these areas. Going forwards, the forum will be a place where members can discuss complex cases, seek second opinions, share best practice, access training and be involved in cutting-edge research, as well as being the first to receive notification of the results of any such research.

**Over the course of the 2 days the following topics will be discussed:**

- **Epidemiology, Diagnosis and Physical findings of FASD**
- **Cognitive profile and difficulties recognising phenotype of FASD**
- **Carers perspective and needs**
- **Attachment**
- **Possible Interventions for FASD**
- **Long-term Outcomes: Into Adulthood.**
- **Practical workshops**

In addition, it is hoped the conference delegates will agree consensus guidelines around diagnosis and recognition of FASD in the UK building on international work and will consider research opportunities on FASD in the UK.

Speakers will include leading international speaker Professor Ed Riley, Dr. Raja Mukherjee, Mary Mather, Jill Clayton Smith, Bronwyn Kerr and Kieran O'Malley

Places on this unique Conference are limited: please book your place now to avoid disappointment:
