

What is Palliative Care?

Sometimes when people get an illness like cancer the Doctors cannot make them better

Palliative care is about making the last part of your life as good as it can be

Palliative care helps with all parts of your life
It cares about the whole person

Palliative care may help with:

Stopping or making your pain less

Stopping other symptoms like feeling sick

Thinking about your life and the things you want to do

Helps you think about your spiritual needs

Helps you cope
with your
sadness and
feelings you have
about dying

Doctors and
Nurses will help
meet your
palliative care
needs
