

Masterclass

Palliative Care for People with Learning Disabilities

Speaker: Linda McEnhill

This interactive course will help delegates to explore the issues and practice of sensitively breaking bad news to people with learning disabilities.

Breaking bad news of life threatening illness is one for the most complex communication tasks that health & social care staff undertake.

In the case of people with learning disabilities this can be additionally complex due to issues related to disability, life experience or a lack of staff skills or experience.

Thursday 27th November
