

Motor Neurone Disease

A day to update and enhance knowledge and understanding

Monday 12th May 2008 from 9:30am – 4:00pm
Education Centre, West Suffolk Hospital, Bury St Edmunds,
Suffolk, IP33 2QZ

MND facts:

- 50% people die within 14 months of diagnosis
- At least 5 people die each day from MND
- Prevalence rising due to ageing population / increased survival.

Learning Outcomes:

- To understand MND & the MND Association's role
- To appreciate aspects of respiratory management
- To understand the psychological impact on families
- To review cognitive changes & their management

Workshops will explore:

Nutritional & feeding issues, advanced care planning, the role of physiotherapy & the views of informal caregivers.

Ideal for:

GPs, health & social care professionals from primary, secondary & intermediate care.

FREE to Suffolk PCT staff, volunteers & students
Cost to others £50.00
