

You can talk to your Doctor and ask any questions you have about your illness and treatment you can have.

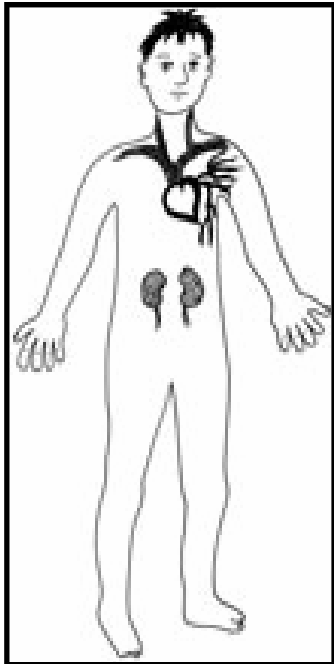

You may feel upset and frightened when you are told about your illness. Try and talk to your family or friends about how you are feeling.

What is Cancer?

Cancer is an illness which causes your body to change. These changes will mean that your body will not work as well as before.

Sometimes you can have cancer in more than one place in your body.

At first you might not know you got cancer but you might find a lump on your body which wasn't there before. If you do find a lump you should tell someone.

You can have Cancer in any part of your body, like in your stomach or in your breasts.

We don't always know why people get cancer. Some things such as smoking can make you more at risk of getting cancer.

You cannot catch cancer from someone who already has it.

You may feel in pain or feel very tired if you have cancer.
